About morismedia

Moris Media is a professionally managed public relations, digital marketing and reputation-management organisation with 12+ years of industry experience, recognised as one of the world's leading PR and digital marketing boutique agencies, working across 40+ countries.

Job Summary

We are actively seeking a highly skilled **Senior React.js Front-End Developer** to join our innovative team. As a key player in our technology department, you will contribute significantly to the creation of cutting-edge and user-friendly web applications.

As a **Senior React.js Front-End Developer** at **Moris Media**, you will play a pivotal role in crafting innovative and robust web applications. Your primary focus will be on developing user interface components and implementing them using well-established React.js workflows, such as Flux or Redux. Collaboration with cross-functional teams, commitment to problem-solving, sophisticated design, and delivering high-quality products are crucial aspects of this role.

This full-time position offers a hybrid work environment, providing flexibility and fostering productivity. We believe in empowering our team members to achieve a healthy work-life balance while contributing to the success of our projects. Join Moris Media and be at the forefront of creating impactful and dynamic digital experiences that elevate our clients' brand credibility and drive sales growth. Your expertise will shape the future of our web development endeavors, and your contributions will be valued in our collaborative and forward-thinking work culture. If you are passionate about React.js development and thrive in an environment that encourages creativity and innovation, we invite you to apply and become a key contributor to our exciting projects.

Primary Responsibilities

As a **Senior React.js Front-End Developer** at Moris Media, you will play a key role in shaping innovative web applications. Your responsibilities include:

- **Developing New Features:** Create new user-facing features using React.js, contributing to the enhancement of our web applications.
- **Building Reusable Components:** Construct reusable components and front-end libraries that can be leveraged for future projects, ensuring efficiency and consistency in development.
- **Code Translation:** Translate designs and wireframes into high-quality, efficient code, maintaining a focus on delivering a seamless user experience.
- **Performance Optimization:** Optimize components for superior performance across a diverse range of web-capable devices and browsers, guaranteeing an optimal user experience.
- **Responsive UI Development:** Design, develop, and maintain responsive user interfaces, emphasizing the use of React.js to achieve visually appealing and user-friendly outcomes.

- **Collaboration:** Collaborate with cross-functional teams, including UX/UI designers and backend developers, to implement robust and scalable solutions, fostering a cohesive and integrated development process.

- **Application Performance:** Ensure the optimization of overall application performance, striving for excellence in delivering seamless and efficient user experiences.

- **Industry Awareness:** Stay informed about the latest industry trends and technologies, actively contributing fresh and innovative ideas to the development process.

- **Troubleshooting and Debugging:** Proactively troubleshoot and debug issues, ensuring timely resolution and maintaining the integrity of the web applications.

- **Code Reviews:** Conduct thorough code reviews, providing constructive feedback to team members, to promote a culture of continuous improvement and excellence in development practices.

As a **Senior React.js Front-End Developer** at **Moris Media**, your commitment to these responsibilities will contribute to the creation of cutting-edge web applications that elevate our clients' brand credibility and drive sales growth. Your role is integral to our collaborative and forward-thinking approach to technology and innovation.

Required Skills

The ideal candidate for the position of **Senior React.js Front-End Developer** at Moris Media should possess a comprehensive set of skills, **including**:

- **Strong Proficiency in JavaScript:** Demonstrated expertise in JavaScript, encompassing proficiency in DOM manipulation and a deep understanding of the JavaScript object model.
- **Thorough Understanding of React.js:** A strong grasp of React.js and its core principles, showcasing the ability to leverage its features effectively in web application development.
- **Experience with React.js Workflows:** Proven experience with popular React.js workflows, such as Flux or Redux, demonstrating the ability to implement efficient state management
- **Familiarity with EcmaScript Specifications:** Knowledge of newer specifications of EcmaScript, staying current with the evolving standards in JavaScript development.
- **Experience with Data Structure Libraries:** Proficiency in working with data structure libraries, such as Immutable.js, to ensure effective data handling and manipulation
- **Knowledge of Isomorphic React:** Familiarity with isomorphic React is a plus, showcasing a broad understanding of developing applications that can run both on the server and client.
- **Familiarity with RESTful APIs:** Understanding and experience with RESTful APIs, ensuring seamless integration with backend services.
- **Modern Authorization Mechanisms:** Knowledge of modern authorization mechanisms, including familiarity with JSON Web Token, to implement secure user authentication.

- **Front-End Build Pipelines and Tools:** Familiarity with modern front-end build pipelines and tools, including but not limited to Babel, Webpack, and NPM, ensuring efficient and streamlined development processes.
- **Experience with Front-End Development Tools:** Proficiency in common front-end development tools such as Babel, Webpack, NPM, etc., facilitating a smooth and efficient development workflow.
- **Business Requirement Translation:** Ability to understand business requirements and translate them into technical requirements, ensuring alignment with project goals.
- **Benchmarking and Optimization:** A knack for benchmarking and optimization, demonstrating a commitment to delivering high-performance web applications.
- **Code Versioning Tools:** Familiarity with code versioning tools, enabling effective collaboration and version control in a team environment.

The **Senior React.js Front-End Developer** at **Moris Media** will thrive by combining these skills, contributing to the development of cutting-edge web applications that elevate our clients' digital presence and **brand credibility.**

Mandatory Requisites:

Candidates must meet the following requirements:

Ability to work in a **Hybrid Mode**, requiring a well-configured **laptop or desktop** and high-speed internet for seamless remote work.
Excellent oral and written communication skills.
Flexibility for occasional outdoor travel.
Strong telephonic skills for client communication.
Excellent management skills with the ability to work under pressure and meet targets.
Patience, a career-oriented mindset, and a **diplomatic approach**

Salary: Negotiable, depending on overall profile, experience, personality, and skills.

Job Location:

Moris Media operates in a **HYBRID MODE**, allowing employees to work from home based on their geography. Travel, if required, will be reimbursed by the company, ensuring maximum performance and productivity as a virtual team.

Qualifications & Experience

To excel in the role of **Senior React.js Front-End Developer** at Moris Media, candidates should meet the following **qualifications**:

- **Bachelor's Degree:** A bachelor's degree in computer science, engineering, or a related field is required, providing a solid educational foundation for the complexities of front-end development.
- **Professional Experience:** A minimum of **5 to 7 years** of professional experience in front-end development, demonstrating a seasoned and comprehensive understanding of the field.
- **Portfolio of React.js Projects:** Showcase a portfolio that highlights previous React.js projects, illustrating the ability to conceptualize, design, and implement successful web applications.

- **Understanding of Best Practices:** Possess a strong understanding of software development best practices, ensuring adherence to industry standards and methodologies in the creation of robust and scalable solutions.

These qualifications will ensure that the **Senior React.js Front-End Developer** at Moris Media is equipped with the necessary education, experience, and skills to contribute significantly to the development of cutting-edge web applications, fostering innovation and excellence in our technology department.

Apply Only Through the Official Job Page

Candidates must review the complete job description, eligibility requirements, work model, location and experience expectations before submitting accurate and updated information through the official application form.

Submitting an application does not guarantee shortlisting, an interview or employment. Moris Media does not request registration charges, security deposits, training fees or candidate payments through its official recruitment process.
