About morismedia

Moris Media is a professionally managed public relations, digital marketing and reputation-management organisation with 12+ years of industry experience, recognised as one of the world's leading PR and digital marketing boutique agencies, working across 40+ countries.

Job Summary

- **Company:** Moris Media
- **Location:** Remote
- **Duration:** 3 Months (Full-time)
- **Stipend:** Based on performance
- **Job Type:** Internship (Full-time)

Program Overview

Moris Media is currently hiring for a **Software Engineer Internship.** This is a **3-month,** full-time internship program designed for aspiring front-end, back-end, and data engineers. During the internship, you will have the opportunity to work on real-world projects and gain hands-on experience, allowing you to develop a deeper understanding of software engineering practices. You will collaborate with a team of professionals who are passionate about technology and innovation, where you can contribute to the development of new solutions and technologies. Throughout this program, you will receive mentorship and guidance from senior engineers, which will help you expand your technical expertise. The internship offers an immersive experience in both coding and problem-solving, as you actively participate in the software development lifecycle. Your performance will be closely evaluated, and if you demonstrate strong contributions, you may receive a stipend based on your achievements. Moreover, exceptional interns who perform well throughout the duration of the internship will be considered for full-time employment opportunities within the company. This internship not only provides exposure to cutting-edge technologies but also offers an invaluable opportunity to be part of a team that fosters continuous learning and growth. It is an ideal opportunity for individuals who are eager to build a strong foundation in software engineering and wish to kick-start their career in a fast-paced, innovative environment.

Primary Responsibilities

1. Collaborate with senior engineers to develop and implement front-end, back-end, or data engineering solutions.
2. Participate in the full software development life cycle, including design, coding, testing, and deployment.
3. Write clean, maintainable, and efficient code for various software projects.
4. Assist in debugging and troubleshooting software issues across different systems.
5. Contribute to the development of new features and improvements in software applications.
6. Actively engage in research to stay updated on new technologies and industry trends.
7. Develop software solutions that meet the project requirements and are scalable and efficient.
8. Work closely with cross-functional teams to integrate new technologies into the company’s projects.
9. Participate in code reviews to ensure adherence to best practices and improve coding standards.
10. Assist in the creation and maintenance of technical documentation for software systems.
11. Apply problem-solving techniques to optimize system performance and scalability.
12. Contribute to data management tasks, including designing and implementing databases and data processing pipelines.
13. Collaborate with other interns and team members to brainstorm, plan, and execute technical projects.
14. Participate in regular team meetings to provide updates on project progress and discuss challenges.

15. Receive mentorship and feedback from senior engineers to enhance technical skills and professional growth.

Required Skills

- 0-6 months of experience in software development or related internships.
- Strong understanding of programming languages such as JavaScript, Python, Java, or relevant technologies based on the focus area (front-end, back-end, data engineering).
- Familiarity with front-end development frameworks like React, Angular, or Vue.js, or back-end technologies such as Node.js, Django, or Spring Boot.
- Basic understanding of databases and data management (e.g., SQL, NoSQL, data pipelines).
- Strong problem-solving skills and ability to analyze complex technical issues.
- Knowledge of version control systems, preferably Git.
- Ability to work collaboratively in a team environment, with excellent communication skills.
- Strong analytical mindset, with attention to detail and a focus on quality.
- Ability to quickly learn and adapt to new technologies and programming languages.
- Willingness to take initiative and work independently when required.
- A passion for technology and continuous learning in software engineering.
- Good understanding of software engineering best practices and development methodologies (e.g., Agile, Scrum).
- Strong time management skills and the ability to prioritize tasks in a fast-paced environment.
- A proactive and flexible personality, with the ability to adapt to new challenges and tasks.

Qualifications & Experience

Qualification Required:

- Currently pursuing or recently graduated with a degree in Computer Science, Software Engineering, Information Technology, or a related field.
- Strong academic background in programming, software development, and technology.

Open for Travel if Required:

- Must be open to occasional travel as needed for project-related tasks, meetings, or team collaborations.

Technical Specifications:

- High-performance Laptop or Desktop with adequate processing power and memory to handle demanding tasks and ensure a seamless workflow.
- High-speed Broadband Internet Connection for reliable access to online resources, collaboration with colleagues, and transferring large files.

- A dedicated Virtual Workstation or a suitable physical workspace conducive to productive and focused work.

Apply Only Through the Official Job Page

Candidates must review the complete job description, eligibility requirements, work model, location and experience expectations before submitting accurate and updated information through the official application form.

Submitting an application does not guarantee shortlisting, an interview or employment. Moris Media does not request registration charges, security deposits, training fees or candidate payments through its official recruitment process.
